NIGHTWATCHER SURVEILLANCE PLUS

WHAT IS NIGHTWATCHER?

The NightWatcher Security Light robotically tracks motion within a 220° active detection zone.

In the event of motion being detected, the light head will automatically activate and then robotically turn towards the breached zone.

This eliminates any security blind spots and gives intruders the sense that they are being monitored.

SURVEILLANCE OPTIONS

Use your computer to view and record live streaming video directly from the Nightwatcher Security Light. Connect the Wireless USB receiver and a beeping alert will sound when movement has been detected.

If you are after mobile viewing access, the wireless digital monitor can stream digital quality video right in the palm of your hand. View video from up to 4 wireless cameras using the quad split screen view.
